CLASS PROJECTS

lmjm.net | Personal Portfolio | Mar 2021

Designed and created to serve as a platform for sharing my projects.
- Built a dynamic site using HTML, CSS, JavaScript, jQuery
- Developed an interactive user experience by creating a responsive site for desktop, tablet and mobile. Deployed sites to Firebase

JM Flix | React Movie Database | Dec 2020 - Jan 2021

Developed a movie database app, similar to IMDB and Letterboxd, using React to create a dynamic site.
Used API from The Movie Database (TMDB) to call on data.
- Designed and built user-friendly site with HTML, SCSS, React, API
- Created a responsive site and worked on devices with a screen size of 320px to 1980px
- Improved the user experience by integrating an add to favorites list by caching data in LocalStorage

Elizabeth Winery | Group Project | Nov 2020

Worked in a team to build a ten-page website to create a positive digital experience for a variety of users with various devices.
- Created a sitemap and a detailed plan for each page of the site using Adobe XD
- Designed an adaptive, mobile-first design by testing on multiple browsers and device sizes
- Showcased a simple custom logo as well as a clean and user-friendly layout
- Gained experienced with Version-control Git
